Not sure why people have reviewed this game negativity, my friend gave it to me as a christmas present and can honestly say i havent had more fun with any game since FNAF 4 came out, got a few trading cards and have more hours to come playing this amazing game.. The card drop thing was corrected!

Nice to see a developer care about stuff. :)

Mind, I only got this for the cards, now I have to add a review? Will do after another look at the game. :). Absolutely horrible.

This game can not be played by anyone having a screen bigger then 720p. Buttons are insanely small and the gameplay is ugly.

3/10. This is like any other towerdefence game. But this might be one of the worst ones. The creator put 0% into the buggs and awkward things in the game... This is a primitive tower defense game composed of Unity Asset flips.

Gameplay is very rudimentary and unfinished. This game feels like it was built 20% of the way and dumped onto Steam. I'm giving this 100% of a thumbs down.. That kind of game that you launch when you need to feel disgusted and throw up.. Although it was fun to play, and low price, I can't but help think this game is incomplete. There are 16 levels in total to beat, the 15th being impossible to do without cheating (ahem). So sad, as it was a promising title that could have delivered so much more.

Very bad, nothing to say more.. real bad, even worse is the fact that they classify the game as a "hardcore classic" while hardcore is the result of awful mechanics

thanks for the cards. This is the result of taking an online course at udemy which teaches you how to build a BASIC tower defence game, and that is exactly what this game is; BASIC. What makes it so hardcore then? the towers just pick a target and shoot at it, there is no targeting options so you can watch the closest enemy to the end just run straight past your towers because they chose to shoot someone else. Its a good thing i only paid 30c for this, thanks to a 90% off voucher, i'll try and recover what i can from the trading cards and count my losses. GAME OF THE YEAR. wow, i didn't know you can code with paint.. Really not the best game.. do yourself a favour and get bloons if you want to play a tower defence.. Very basic production values and controls that only work sporadically on my machine. User interface is rudimentary and doesn't appear to fully work since I don't have visible buttons for choosing different tower types. Creators should review games like Defense Grid and Kingdom Rush if they want tips on how to improve the game.. I would not recommend this game, although it has fancy graphics and chilled music which I really enjoyed the six minutes I played it. Unfortunately I had to stop this gem of a game, since you can't lower the volume and i didn't want to end up deaf.. Game completed!. Feels very cheaply made and most browser tower defences are better.
